Conservation Tips for Beginner Anglers

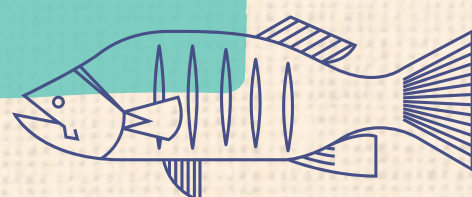

1 Don't keep more fish than you and your family can eat.

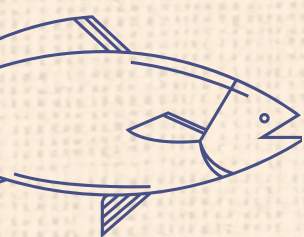

2 Proper catch and release techniques ensure fish have the best chance to survive.

3 Pack out what you pack in, and pick up any litter you see while on the water.

4 Make sure you know the fishing regulations (including size and bag limits) in your waterways.

5 If you are fishing from a boat, don't power through rooted aquatic vegetation.

6 Buy your license to help fund conservation efforts.
